DETAILED ACTION

Election/Restriction

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-6, drawn to a system for automated finance, business, or management practice, comprising a networked point-of-sale terminal or an electronic cash register, classified in class 705, subclass 16.
 - II. Claims 7-13, drawn to a method of automated financial, business, or management practice, comprising financial funds transfer or credit transaction for bill payment, classified in class 705, subclass 39.
 - III. Claims 14-20, drawn to a system for automated finance, business, or management practice, comprising a point-of-sale terminal or electronic cash register having a record bearing medium or carrier interface for electronic funds transfer or payment credit, classified in class 705, subclass 17.

2. The inventions are distinct, each from the other because of the following reasons:

Invention II is related to Inventions I and III, as process and apparatus for its practice. The inventions are distinct if it can be shown that *either*: (1) the process as claimed can be practiced by another, materially different apparatus, or by hand, *or* (2) the apparatus as claimed can be used to practice another, materially different process. (MPEP § 806.05(e)). In this case, the process as claimed can be practiced by another, materially different apparatus, such as a fax machine.

Invention I is related to Invention III as combination and subcombination. Inventions in this relationship are distinct if it can be shown that: (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, *and* (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In this case, the combination as claimed does not require the particulars of the subcombination as claimed, because a system in accordance with Invention I need not include any magnetic detector. The subcombination has separate utility, such as for use in combination with a local data processing device coupled to the point-of-sale terminal by a communication link connected to the communication circuit.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. A telephone call was placed to Mr. Steven H. Slater (Reg. N^o 35,361), attorney for applicant, on November 26, 2003, to discuss an oral election to the above restriction requirement, but the call did not result in an election being made.

5. Applicant is advised that the reply to this requirement, to be complete, *must* include an election of the invention to be examined, even if the requirement be traversed (37 CFR 1.143).

Conclusion

6. Any inquiry concerning this communication, or earlier communications, should be directed to the examiner, **Jerry O'Connor**, whose telephone number is **(703) 305-1525**, and whose facsimile number is **(703) 746-3976**.
